

RED CROSSBILL OBSERVATION POINTS NEAR SHORES LAKE, OZARK NF

You can generate a map by typing "Shores Lake, Arkansas" into Google maps.

Red Crossbills have been observed in quite a few places throughout this area. These two stops have been relatively-speaking more productive. Notice there is a road intersection (75 X 215) before you get to Shores Lake. The "wide shoulder" is about 0.5 miles before the intersection. The "brown" (or maybe green?) gate is about 0.2 miles past the intersection. Just remember that Red Crossbills move around a lot, so these are just suggested starting point. (December 2020).
